

### 31. Rope Jump

You need a rope for this one! Have students stand behind each other in a line. Hold a rope (have a student hold the other end) at a height that they should be able to jump over. On the other side of the rope spread out some objects or flashcards and a box. Call out the name of one of the objects/flashcards to the first student. S/he has to jump over the rope, pick up the correct object and put it in the box. For other rounds you can hold the rope down low, so have to crawl/roll under.
