

33. Snowballs

The teacher or the students draw on the board items related to the target lesson (fruits, animals, veggies, etc.) Make two teams. One student from each team gets a wet tissue ("Snow ball") and stands up. The rest of the class picks a card which can not be seen by the two standing, who will throw their "snow ball" as they hear the other call an item out (e.g.: "Apple!"). The team whose participant hits closer to the item called out, gets a point.
